more after COVID

THE OFFICE IS NO LONGER JUST A SINGLE LOCATION

Technology allows our employees to be efficient in a variety of locations and provides choice within the workspace.

The office changes from where we go to work, to where we go to work with others.

OFFICE CHANGES FROM WHERE WE GO TO WORK, TO WHERE WE WORK WITH OTHERS

WORKPLACE CONTINIUM

COWORKING

Offers fully serviced **workspace on demand.** Serviced offices support the **ability** to quickly **scale** to business needs. They are ideal for small sites or to offer bridge solutions to growth or changes to an HP office.

HOME OFFICE

Offers employees **ultimate flexibility for work–life integration.** Leveraging digital tools, employees have the choice of working at home. The mobility program will **not** ask employees to **telework** unless the office closes.

HP OFFICE

Serves as a hub to house **specialty activities and to gather our workforce** to collaborate and innovate. It becomes a destination with a purpose having more shared spaces intended to increase utilization and office energy.

SUPPORTING MOBILITY WITH TOOLS AND RESOURCES

Today, we have a good start on a portfolio of tools and resources in place to support mobility, and the portfolio will get much better over time.

Digital tools and work processes should enable each of us to be our best selves and do our best work, regardless of location in the world.

Bringing the right **diverse teams** together, regardless of where they work, enables teams to innovate faster and more effectively.

Having a sense of **connection** and **belonging** helps employees have a sense of purpose, even when they are working with globally dispersed teams.
